Web and Mobile Applications Programmer

AMTELCO is a leading provider of call handling and messaging software for the healthcare, answering service, and call center industries. The Web and Mobile Applications Programmer, based in Madison, WI, works as a member of the web applications development team. This is an engineering and development position, not a web page/web site design position.

Full time position – reports to the senior programmer serving as team leader and/or the Vice President for Software Development

Essential Duties and Responsibilities:

- Work independently, and with the web applications development team, to develop browser-based versions of AMTELCO's communications applications
- Maintain up-to-date records of all software development activities in the department's feature and defect tracking software
- Use the department's source code control software to create and maintain discrete versions of all code produced
- Participate in code reviews with the web applications development team members and with senior software engineers
- Conduct functionality, integrity, and security testing on all code produced as a step in the software development process
- Work with the software documentation team to develop system administration and user reference guides and on-line help files
- Assist the Field Engineering Team in troubleshooting customer-reported issues
- Attend weekly department and team meetings
- Provide the department managers with a written weekly report of development activities

Qualifications:

- Bachelor's degree preferred, Associate's degree required, with an emphasis in software engineering and development
- Knowledge of Visual Studio and C# programming required
- Knowledge of one or more of the following web technologies expected: HTML5, Bootstrap, CSS, JQuery, Knockout, ASP.NET MVC
- Knowledge of Android Studio and/or Apple Swift/Xcode mobile device operating systems preferred
- Strong problem-solving skills, attention to detail, and multi-tasking skills
- Reliable with a professional attitude and good communication skills
- Experience in answering service or healthcare environment helpful

To apply:

Submit a cover letter and resume to Employment@amtelco.com.
